Installation

Activate plugin using WordPress Plugin screen

You can set gateway settings through EDD Settings or simple just click on this link. At the next screen, check **EDD Ultimate PayPal** and configure it as below.

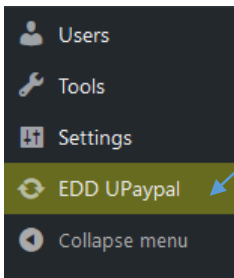

Note that configuration may vary depending on your site and settings.

EDD Ultimate Paypal

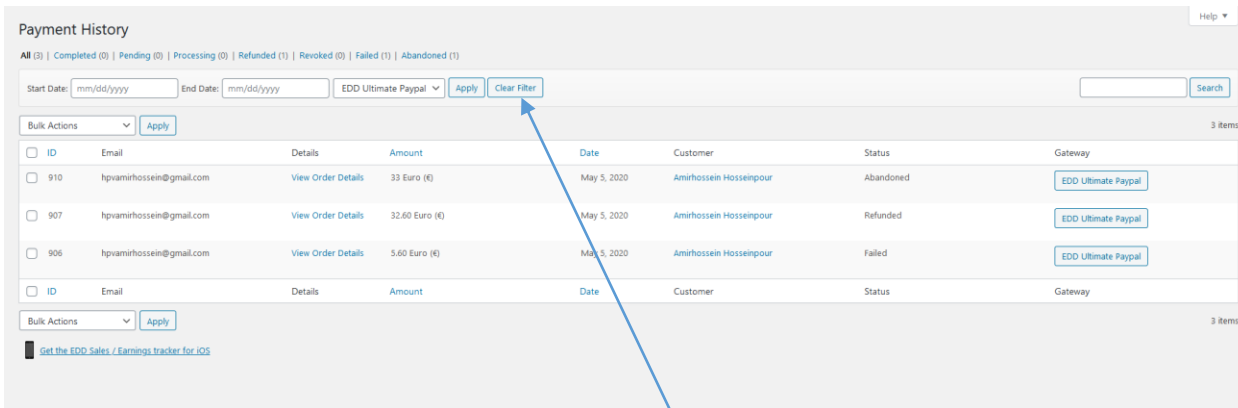

External Site address	<input type="text" value="https://wpthemeok.com/"/>
Currency Name	<input type="text" value="Euro"/>
Currency Sign	<input type="text" value="€"/>
Checkout label	<input type="text" value="Ultimate Secure Paypal Checkout"/>
Site name in Paypal	<input type="text" value="Localhost"/>

Filtering Payments

After plugin activation, you'll see new menu item added to WordPress dashboard, as highlighted in following screenshot:

By clicking this menu item, you'll be redirected to a list of all payments done using this gateway.

To quit this view, simply click on **"Clear Filter"** at top of page.

Changes made

This plugin overwrites some EDD's functionalities and templates, which are listed below.

TRANSACTION HISTORY TABLE

ID	Date	Amount	Details	Gateway
#910	May 5, 2020	33.00 €	Abandoned	Ultimate Secure Paypal Checkout
#909	May 5, 2020	1,000 RIAL	Pending	Zarinpal, Iranian Secure gateway
#907	May 5, 2020	55.44 €	Refunded	Ultimate Secure Paypal Checkout
#906	May 5, 2020	54.60 €	Failed	Ultimate Secure Paypal Checkout
#903	May 5, 2020	77,000 RIAL	View Details and Downloads	Free Purchase

As you see, because we are using two currencies, we needed to specify custom amount and currency for each transaction, so we did! And also we added a new column, named *Gateway* which shows what gateway has been used to complete the transaction.

Note that changing currency won't change prices and currency used in table above.

 [Get the EDD Sales / Earnings tracker for iOS](#)

We added an extra column named **Gateway** and showed the gateway used to process the payment and also linked it to a list of all payments made using that gateway, isn't this awesome!? You'll notice that **Amount** column has changed too. Since we are using multiple currency and multiple prices, we need to know what currency and price has been used during payment placement, so, if payment was placed using **EDD ULTIMATE PAYPAL**, the second price and currency will take place instead of regular price and current EDD's currency.

EDD CHECKOUT FORM

Item Name	Item Price	Actions
EDD Sample DL	27.50 €	Remove
Total: 27.50 €		

Select Currency

☐ Iranian Rial (ریال) ☒ Euro (€)

Item Name	Item Price	Actions
EDD Sample DL	1,000 ریال	Remove
Total: 1,000 ریال		

Select Currency

☒ Iranian Rial (ریال) ☐ Euro (€)

»

As you see, a new field has been added to checkout form, which allows you to change currency right on the fly. You can also change currency using nav-menu items and checkout form will refresh it's data. Keep in mind that by choosing your second currency, you'll only have one gateway option which is **EDD ULTIMATE PAYPAL**, but when you select your EDD's currency, all other gateways will show up. To inform users of this matter, we added next ability, the Pay via wrap.

'PAY VIA' WRAP

Pay via: Zarinpal, Iranian Secure gateway

Purchase Total: 1,000 ریال

COMPLETE PURCHASE

We added a new wrap before **Purchase Total** in checkout page which tells you what gateway is selected and is going to handle the payment for you. So you can double check it :) .

TRANSACTION RECEIPT

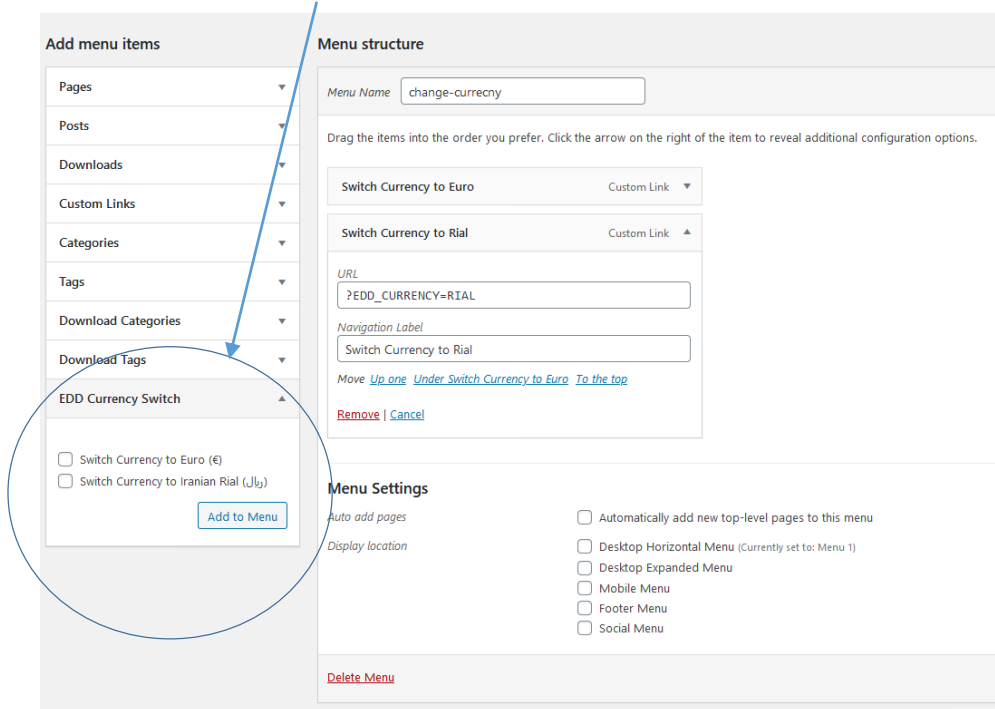

Payment:	910
Payment Status:	Abandoned
Payment Method:	Ultimate Secure Paypal Checkout
Date:	May 5, 2020
Subtotal:	33.00 €
Total Price:	33.00 €

Products

Name	Price
EDD Sample DL	28.00 €
Variable DL – v-two	2.00 €
Variable DL – v-three	3.00 €

We have altered the receipt of your purchase again due to having multiple currency and prices, so the data on recipes are fixed and will not change when you switch your currency. We also changed the functionality of Payment method and used checkout label of gateway as it's indicator.

You can add currency switch menu items to your site or use it everywhere you like, just add them to a new menu item and use the menu as a widget or as navigation menu items. The secret behind this is the magic URL query, **EDD_CURRENCY**, do not tend to delete or change menu item's URL. But if you are interested, you can use this query string in links so currency will switch right after clicking on link.

Delete Payment Save Payment

As you see, if the payment is made using **EDD ULTIMATE PAYPAL**, then you'll have this notification on top of page that guides you to check all payments made using this gateway and also tell you that currency used in this page are not as same as EDD's default one, but rather it's your second currency. Price format in this page uses two digit format like 14.55 or 17.00.

Note that when you change item's price, the Download Total will not render correctly but after saving data, you'll see the well-formed prices.

Limits

This plugin does have some limits which are planned to be fixed and added as new features.

1. This Plugin is dependent on **EDD PayPal Redirect** by [Black Swan Lab](#)
2. Second Currency Based Discount code
3. Multiple Currency (more than two)
4. Filtering Email Data when using Second Currency
5. Second Price column in EDD Downloads screen
6. Show / Hide Downloads based on Second Currency
7. Option to Enable or Disable Extra Price and Second Currency
8. Make Downloads use specific type of Currency
9. Mixed Currency Checkout
10. Currency based notice for users
11. ... you add some ...

Specifications

This plugin was tested on WordPress v.5.4.1 — Easy Digital Downloads v.2.9.23 — PHP 7.3.12 with almost no error or warning or malfunctioning or failure. Use happily.

Credits

This plugin was written for the very first time to fulfill the need of Downloadly.ir site and is copyrighted to Black Swan Lab, Specialized WordPress Development Center based on Tehran, Iran.
